**ARTIFICIAL INSEMINATION STALLION PERMIT APPLICATION FORM**

**NOTES FOR ARTIFICIAL INSEMINATION STALLION PERMIT**

**Please ensure you have read the Society's Rules of Registration before completing this application form. By signing this form, you are agreeing that you have read these rules and agree to abide by these rules.**

**Stallion owners must obtain a lifetime A.I. permit for the stallion which is used in artificial insemination schemes. The permit must be obtained from the Society, per stallion. Retrospective permits must be applied for stallions already used in A.I. schemes.**

**Stallions to be used in Artificial Insemination MUST be DNA profiled before undertaking the collection and insemination process. In the case of stallions, they must be DNA profiled and licenced in accordance with the Society rules, and in the case of mares they must be DNA profiled in order that parentage testing of their foals can be effected, if required.**

Stallion owners must maintain a special Report of Service which will be returned to the Society at the end of the covering season. Stallion owners must periodically submit reports of service to the Society outlining how many straws of semen have been sold, and the names of the mare owners and full registered names of the mares that were intended for insemination. It is the stallion owner/agent's responsibility to collect this information and notify the Society periodically in writing.

If frozen semen is sold in bulk by the owner of the stallion, then the seller and buyer must notify the Society in writing stating the nature of the sale, the number of straws transferred, and the buyer of the frozen semen must then produce periodic reports of service which are submitted to the Society.

The collection of the semen shall be carried out by a Veterinary Surgeon or an approved person, who will complete part one of the Society A. I. form. Insemination shall be carried out by a Veterinary Surgeon or an approved person who will complete part two of the Society A. I. form.
